If Rheumatic Begin on Salts

Says We Must Keep Feet Dry. Avoid Exposure, Eat No Sweets

Stay off the damp ground, avoid exposure, keep feet dry, eat no sweets of any kind for a while; think lots of water, a glass a day, a spoonful of Jod Salts occasionally to help keep down uric acid.

Rheumatism is caused by poison toxins, called acids, which are generated in the blood and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine.

At the first twinge of rheumatism get out any pharmacy about four ounces of Jod Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is helpful to neutralize acidity, remove blood poisons, stimulate the system, and help to rid the blood of these rheumatic poisons.

Jod Salts is inexpensive and is made from the acid of grapes and lemon juice, combined with lithia, and is used with excellent results by thousands of folks who are subject to rheumatism.—Adv.
