MILLTOWN NEWS.

Tomorrow's Election Is Most Important in History of the Borough

Milltown's Future Depends Upon It—Michelin Co. to Build Reclaiming Works if Water and Sewer Systems Are Voted For.

MILLTOWN, May 4.—To-morrow, May 5, is "Decision Day" in Milltown, when the voters will decide whether or not they want the proposed water and sewerage systems...

Arguments have been heard for and against the proposition. The principle arguments against are: 1. The increased tax rate.

2. The discomfort of making improvements, such as torn up streets, etc. 3. Annexation with the New Brunswick sewer system.

4. The probable pollution of private wells now in use. 5. The size of the main which will carry the sewage from Milltown to New Brunswick.

These arguments are answered by those favorable to the plans in this manner: 1. A town never begins to grow until it is bonded. The total bonded indebtedness will amount to approximately \$100,000...

2. The cost of the establishment of a sinking fund plus the cost of operation of the system, will amount to approximately between \$8,000 and \$9,000 annually, which cannot be claimed to be excessive in a town of one million dollars valuation...

3. The annexation with New Brunswick does not place us under any obligations to that city, being but a purely business proposition for the protection of their water supply.

4. With the clay and sandy soil, which proves to be an excellent filter, it is unlikely and improbable that the wells will be polluted, the small amount of sewage which escapes from the pipe comes together, and plastered into a hole, will become purified in a flow of a few feet in that nature of soil.

5. Three engineers of note have declared that a twelve inch main will carry all the sewage from Milltown, if there was a house on every lot in the borough, which should be satisfactory to those skeptical on this point.
